

## FD1 Fused Distribution Board

### Introduction

The FD1 Distribution Board is used to provide 4 fused outputs from a single power source. The module accepts any voltage at terminals PWR and will split this into 4 outputs via individual 1A fuses to power auxiliary equipment.

### Specifications

Dimensions	90 x 50 mm.
Input Voltage	AC or DC.
Output	4 x 1A Fused outputs

### Connection

Terminal (PWR)	Connection for power supply please observe polarity.
Terminal (F1,F2,F3 ,F4)	1A Fused outputs

### Wiring
